

# Important Advisory for RBC Visa Cardholders

Your RBC Visa debit, credit and prepaid cards support many transactions. One of these is Original Credit Transactions (OCT) used to process incoming payments from a Visa OCT Originator, such as person-to-person payments through an electronic wallet or gambling winnings.

Due to Anti Money Laundering and Anti-Terrorist Financing (AML/ATF) controls, effective November 18, 2019, the OCT function will no longer be available for these cards.

Clients who have been receiving OCT payments on their Visa cards should advise the sender of the OCT that this service is no longer available.

Please note: This change does not affect regular purchases or refund transactions for purchases of goods/services or for returns from a merchant.
