Statement of Trustee's Responsibilities
Roytrin Money Market Fund Class A – TT Dollar

The Trustee is responsible for the following:

- Preparing and fairly presenting the accompanying financial statements of Roytrin Money Market Fund Class A – TT Dollar (the Fund), which comprise the statement of financial position as at June 30, 2021, the statements of profit or loss and other comprehensive income, changes in net assets attributable to unitholders and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information;
- Ensuring that the Fund keeps proper accounting records;
- Selecting appropriate accounting policies and applying them in a consistent manner;
- Implementing, monitoring and evaluating the system of internal control that assures security of the Fund's assets, detection/prevention of fraud and the achievement of operational efficiencies;
- Ensuring that the system of internal control operated effectively during the reporting period;
- Producing reliable financial reporting that complies with laws and regulations, to which the Fund is subject, but not limited to the Fund's governing documentation; and
- Using reasonable and prudent judgement in the determination of estimates.

In preparing these financial statements, the Trustee utilised the International Financial Reporting Standards, as issued by the International Accounting Standards Board and adopted by the Institute of Chartered Accountants of Trinidad and Tobago. Where International Financial Reporting Standards presented alternative accounting treatments, the Trustee chose those considered most appropriate in the circumstances.

Nothing has come to the attention of the Trustee to indicate that the Fund will not remain a going concern for the next twelve months from the reporting date; or up to the date the accompanying financial statements have been authorised for issue, if later.

The Trustee affirms that it has carried out its responsibilities as outlined above.

**Independent Auditors' Report
To the Shareholders of Roytrin Money Market Fund Class A – TT Dollar**

Opinion

We have audited the financial statements of Roytrin Money Market Fund Class A – TT Dollar (“the Fund”), which comprise the statement of financial position as at June 30, 2021, the statements of profit or loss and other comprehensive income, changes in net assets attributable to unitholders and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at June 30, 2021, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in the Republic of Trinidad and Tobago, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matters (continued)

Completeness, existence and valuation of investment securities - unquoted

Refer to Note 2 (e) “Significant Accounting Policies: Investment Securities”, Note 5 “Investment Securities at FVTPL” and Note 14 “Fair Value of Financial Instruments”.

Description of the key audit matter	How the matter was addressed in our audit
<p>81% of the Fund’s total assets consists of investments for which no quoted market prices are available. Unquoted investments are measured at fair value, which is established by using measurements of value such as discounted cash flow models. There is significant risk relating to the valuation of these investments given the judgmental nature of the matters that require consideration by the investment manager and Valuation Committee, and due to their materiality in the context of the financial statements as a whole.</p>	<p>Our procedures over the completeness, existence and valuation of the Fund’s investment portfolio included, but were not limited to:</p> <ul style="list-style-type: none"> • documenting and assessing the design and implementation of the investment valuation processes and controls in place; • assessing the fair value \$152,771,038 of the investments through the use of our own valuation specialist to independently test the valuation model and assess the appropriateness of assumptions such as discount factors and underlying financial data inputs by comparing these to external market sources; • comparing the fair value of \$2,825,016,116 of the investments sold post-year-end to proceeds received or for short-term investments to investment agreements where the cost approximates to the fair value; • obtaining external confirmation of the investment portfolio and agreeing it to the schedule of investments held at year end; <p>No material exceptions were noted as part of our testing.</p>

Responsibilities of Trustee and Those Charged with Governance for the Financial Statements

The Trustee, being charged with the governance of the Fund, is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as the Trustee determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Trustee is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

The Trustee is responsible for overseeing the Fund's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Trustee.

Auditors' Responsibilities for the Audit of the Financial Statements (continued)

- Conclude on the appropriateness of the Trustee's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is Marissa Quashie.

A handwritten signature of the KPMG firm, written in blue ink, appearing as 'KPMG' with a stylized flourish at the end.

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

1. Description of the Fund

The following brief description of the Roytrin Money Market Fund Class A – TT Dollar (the Fund) is provided for general information purposes only. Reference should be made to the Trust Deed and rules of the Fund for more complete information.

General

The Fund is an open-ended fund registered in Trinidad and Tobago and was established by RBC Royal Bank (Trinidad and Tobago) Limited, under a Trust Deed dated April 10, 2012. The principal activity of the Fund is to provide investors with the opportunity to invest in short term securities which offer high liquidity and a competitive rate of return. The Trustee of the Fund is RBC Trust (Trinidad and Tobago) Limited and the Investment Manager is RBC Investment Management (Caribbean) Limited.

Subscriptions

Subscriptions to the Fund are made by investors and are expressed in units using the net asset value per unit determined on each business day. Units may be subscribed at a minimum initial value of \$100,000 and \$10,000 thereafter.

Distributions

The net income received by the Fund is allocated and distributed at the discretion of the Investment Manager supported by the management accounts. Net income paid out to investors is to be accrued daily and distributed monthly. All distributions will, in the absence of instructions from the investor to the contrary, be reinvested in additional units of the Fund at the net asset value of such units calculated on the date of distribution.

Redemptions

Units are redeemed without charge at a price per unit (bid price) based on the net asset value per unit at the date of receipt of the request for redemption. Units may be redeemed in cash up to a limit of \$1,000,000 or one percent of the net asset value of the Fund, whichever is lower, during any ninety day period for any one investor. Should a redemption request exceed this limit, units in excess may, at the discretion of the Trustee, be redeemed in specie in proportion to the underlying assets.

Taxation

Distributions paid to resident unit holders are not subject to tax. For distributions paid to non-resident unit holders, tax on interest income is withheld at the rates applicable to the country in which the unit holders reside.

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

2. Significant Accounting Policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

a. Basis of preparation

These financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board.

b. Basis of measurement

These financial statements have been prepared on a historical cost basis except for Investment Securities at fair value through profit or loss (FVTPL), that have been measured at fair value.

c. Use of judgements and estimates

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Trustee to exercise their judgment in the process of applying the Fund's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 4.

d. Foreign currency transactions

(i) Functional and presentation currency

The financial statements are presented in Trinidad and Tobago dollars which is the Fund's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the translation at year-end exchange rates of monetary assets and liabilities are recognised in profit or loss. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

2. Significant Accounting Policies (continued)

e. Investment securities

The Fund classifies its investment securities as fair value through profit or loss (FVTPL). Management determines the classification of its investment securities at initial recognition.

Fair value through profit or loss investment securities

Fair value through profit or loss investments are those investment securities intended to be traded on a periodic basis to maximize capital gains.

(i) Recognition, initial and subsequent measurement

Fair value through profit or loss investment securities are initially recognised at cost and are subsequently remeasured at fair value based on quoted market prices where available or discounted cash flow models. Unrealised gains and losses arising from changes in the fair value of investment securities classified as fair value through profit or loss are recognised in profit or loss. Refer to Note 10.

(ii) Classification

On initial recognition, the Fund classifies financial assets at amortised cost or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI).

All other financial assets of the Fund are measured at FVTPL.

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

2. Significant Accounting Policies (continued)

e. Investment securities (continued)

(ii) Classification (continued)

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the Fund considers all of the relevant information about how the business is managed including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Fund's management;
- the risks that affect the performance of the business model (and the financial assets held within the business model) and how those risks are managed;
- how the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Fund's continuing recognition of the assets.

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

2. Significant Accounting Policies (continued)

e. *Investment securities* (continued)

(ii) *Classification* (continued)

The Fund has determined that it has two business models.

- *Held-to-collect business model*: this includes cash and cash equivalents and interest income and other receivables. These financial assets are held to collect contractual cash flow.
- *Other business model*: this include debt securities. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

(iii) *Fair value estimation*

The fair values of quoted investments in active markets are based on current bid prices. For unlisted securities and those where the market is not active, the Fund establishes fair value by using valuation techniques.

These include the use of recent arm's length transactions, discounted cash flow analysis, pricing models and other valuation techniques commonly used by market participants.

All purchases and sales of investment securities are recognised on the trade date.

(iv) *Derecognition*

The Fund derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest in such transferred financial assets that is created or retained by the Fund is recognised as a separate asset or liability.

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

2. Significant Accounting Policies (continued)

e. *Investment securities* (continued)

(iv) *Derecognition* (continued)

When the Fund enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all or substantially all of the risks and rewards are retained, then the transferred assets are not derecognised. Transfers of assets with retention of all or substantially all of the risks and rewards include sale and repurchase transactions.

The Fund derecognises a financial liability when its contractual obligations are discharged or cancelled, or expired.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

f. *Impairment of financial assets*

The Fund utilizes the expected credit loss (ECL) model to determine impairment of financial assets which are classified financial instruments that are measured at amortised cost, for these financial instrument's lifetime ECLs are recognised.

Objective evidence that a financial asset is impaired includes observable data that comes to the attention of the Fund about the following loss events:

- (i) significant financial difficulty of the issuer or debtor;
- (ii) a breach of contract, such as default or delinquency in payments;
- (iii) it is becoming probable that the issuer or debtor will enter bankruptcy or other financial reorganisation;
- (iv) the disappearance of an active market for that financial asset because of financial difficulties;
- (v) observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of individual assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group, including:
 - adverse changes in the payment status of issuers or debtors in the group; or
 - national or local economic conditions that correlate with defaults on assets in the group.

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

2. Significant Accounting Policies (continued)

g. Cash and cash equivalents

Cash and cash equivalents are measured at amortised cost and comprise cash in hand and deposits with banks and short term investments with original maturities of less than three months at the time of acquisition.

h. Provisions

Provisions are recognised when the Fund has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

i. Net assets attributable to unitholders

The Fund classifies financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments.

The Fund has only one class of redeemable units in issue and on liquidation of the Fund, they entitle the holders to the residual net assets, after repayment of all debts, liabilities, fees or commissions outstanding. All redeemable units rank *pari passu* in all respects and have identical terms and conditions. The redeemable units provide unitholders with the right to require redemption for cash at a value proportionate to the unitholder's share in the Fund's net assets at each redemption date, subject to certain restrictions as outlined in Note 1, and also in the event of the Fund's liquidation.

A puttable financial instrument that includes a contractual obligation for the Fund to repurchase or redeem that instrument for cash or another financial asset is classified as equity if it meets all of the following conditions:

- It entitles the holder to a pro rata share of the Fund's net assets in the event of the Fund's liquidation;
- It is in the class of instruments that is subordinate to all other classes of instruments;
- All financial instruments are in the class of instruments that is subordinate to all other classes of instruments have identical features;

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

2. Significant Accounting Policies (continued)

i. Net assets attributable to unitholders (continued)

- Apart from the contractual obligation for the Fund to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any other features that would require classification as a liability; and
- The total expected cash flows attributable to the instrument over its life are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the Fund over the life of the instrument.

The Fund's redeemable units meet these conditions and are classified as equity.

j. Net income from financial instrument at FVTPL

Net income from financial instrument at FVTPL includes all realised and unrealised fair value changes and foreign exchange differences, interest and dividend income.

k. Expenses

Expenses are accounted for in profit or loss on the accrual basis.

l. Subscriptions and redemptions

Subscriptions and redemptions are recorded when the subscription and redemption is incurred.

m. Income tax

Under the current system of taxation in Trinidad and Tobago, the Fund is exempt from paying income taxes.

However, some dividend and interest income received by the Fund is subject to withholding tax imposed in certain countries of origin. Income that is subject to such tax is recognised gross of the taxes and the corresponding withholding tax is recognised as tax expense.

The Fund has determined that interest and penalties related to income taxes do not meet the definition of an income tax. They are therefore accounted for under IAS 37, *Provision, Contingent Liabilities and Contingent Assets*.

2. Significant Accounting Policies (continued)

n. Comparatives

During 2021, the Fund corrected a prior period error by restating the prior period comparatives as a result of the classification of Net assets attributable to unitholders as a financial liability rather than as equity (See Note 2(i)). Prior to the restatement, distributions were shown in the statement of profit or loss and after restatement it is shown within the statement of changes in net assets attributable to unitholders. Comparative amounts in the statement of financial position were reclassified for consistency. Based on the prospectus, the Investment Manager has ultimate discretion over whether to make distributions or not.

Statement of financial position reclassification

	<u>2019</u>	<u>Adjustment</u>	<u>2019 restated</u>
	\$	\$	\$

	-	-	-

3. New and Revised International Financial Reporting Standards (IFRS)

a. New and amended standards adopted by the Fund

No standards have been adopted by the Fund for the first time for the financial year beginning on or after July 1, 2020.

b. New and amended standards not yet adopted

A number of new standards and amendments to standards are effective for annual periods beginning after July 1, 2020 and earlier application is permitted; however, the Fund has not early adopted these new or amended standards in preparing these financial statements. None of these are expected to have a material impact on the Fund's financial statements.

4. Critical Accounting Estimates and Judgments in Applying Accounting Principles

Determination of fair value of unquoted financial assets

The fair values of financial assets that are not quoted in active markets are determined by using valuation techniques. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. To the extent practical, models use only observable data, however areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates.

5. Investment Securities at FVTPL		
Government debt securities	1,102,218,735	1,706,869,203
Corporate investments	<u>1,875,568,419</u>	<u>1,303,650,647</u>
Total investment securities	<u>2,977,787,154</u>	<u>3,010,519,850</u>

All investment securities are unquoted.

6. Other Receivables

Other receivables represent accrued subscriptions recorded in the Branches on the last day of the year but for which cash was subsequently transferred to the Fund on the next day.

7. Total Annual Return

Total annual return represents the increase in the net asset value per unit over prior year and the accumulated daily income distribution rates during the period. Income distribution, which is based on the net income, is calculated and accrued daily. All returns were reinvested (see Note 1).

	<u>2021</u>	<u>2020</u>
	%	%
Average rate of return	<u>0.66</u>	<u>1.35</u>

8. Management Fees

Management fees are paid to the Trustee at a rate of up to 2% of the daily average total assets of the Fund, out of which the Investment Manager will be remunerated.

	<u>2021</u>	<u>2020</u>
	No.	No.
9. Number of Participating Units		
Units outstanding at beginning of the year	342,581,504	248,009,173

10. Net Income from Financial Instruments at FVTPL

All the gains (losses) below represent income (expenses) from debt securities.

	<u>2021</u>	<u>2020</u>
	\$	\$
Net income from financial instruments at FVTPL		
Realised	55,670,330	46,977,950
Unrealised	<u>1,107,767</u>	<u>22,183,301</u>
	<u>56,778,097</u>	<u>69,161,251</u>

The realised gain/loss from financial instruments at FVTPL represents the difference between the carrying amount of a financial instrument at the beginning of the reporting period, or the transaction price if it was purchased in the current reporting period, and its settlement price.

The unrealised gain/loss represents the difference between the carrying amount of financial instruments at the beginning of the period, or the transaction price if it was purchased in the current reporting period, and the carrying amount at the current reporting period.

11. Related Party Transactions

A party is related to the Fund if:

- (a) The party is a subsidiary or an associate of the Fund;
- (b) The party is, directly or indirectly, either under common control or subject to significant influence with the Fund, or has significant influence over or joint control of the Fund.
- (c) The party is a close family member of a person who is part of key management personnel or who controls the Fund;
- (d) The party is controlled or significantly influenced by a member of key management personnel or by a person who controls the Fund;
- (e) The party is a joint venture in which the Fund is a venture partner;
- (f) The party is a member of the Fund's or its Trustee's key management personnel;
- (g) The party is a post-employment benefit plan for Fund's employees.
- (h) The party, or any member of a group of which it is a part, provides key management personnel services to the Fund.

Management fees payable	378,970	330,888
Distributions to unit holders	79,855	38,545

12. Financial Risk Management

Financial Instruments

Financial assets includes investment securities, interest income receivable, other receivables and cash and cash equivalents.

Financial liabilities include management fees and other payables.

a. Risk management

The Fund's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risk. Taking risk is core to the financial business and operational risks are an inevitable consequence of being in business. The Trustee's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects in the Fund's financial performance by focusing on the unpredictability of financial markets.

The Trustee's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls and to monitor the risks and adherence to limits by means of reliable and up to date information systems.

The most important types of risks to the Fund are liquidity risk, market risk, and credit risk. Market risks include currency risk, interest rate risk and other price risk.

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

12. Financial Risk Management (continued)

a. Risk management (continued)

While the Trustee is ultimately responsible for identifying and controlling risks, there are separate independent bodies responsible for managing and monitoring risks as follows:

Board of Directors

The Board of Directors of the Trustee has overall responsibility and oversight for corporate governance and specifically, approval of the investment policy and limits of authority. The Board of Directors has delegated authority to the Investment Committee and the Sub-Investment Committee as appropriate.

Investment Policy Committee

The Investment Policy Committee is the body responsible for approving all Statements of Investment Policy (SIP) and reviewing compliance with same. The Investment Policy Committee meets on a quarterly basis to review and ratify any changes to the SIP.

Investment Strategy Committee

The Investment Strategy Committee is engaged in providing guidance to the Investment Manager relative to economic and capital markets. In this regard, input would include economic data, foreign currency perspectives, local, regional and international equity and fixed income information. From this body of information, the Committee shall distill its views with respect to an assessment of global fiscal and monetary conditions, projected economic growth, inflation, direction of interest rates, major currencies and stock prices.

Excessive Risk Concentration

In order to avoid an excessive concentration of risk, the Fund's investment policy and risk management procedures include specific guidelines to ensure the maintenance of a diversified portfolio.

The Investment Manager is mandated within prescribed limits to manage excessive concentration risk when it arises.

	<u>-</u>	<u>-</u>	<u>6,970,524</u>	<u>6,970,524</u>

c. Liquidity risk

The Fund is exposed to daily cash redemptions of units. At least 5% of the investment portfolio is usually held in short-term instruments that can be quickly converted to cash. The Fund also has the ability to borrow in the short term to ensure settlement, however no such borrowing occurred during the year. The Trust Deed also permits the Fund to settle in specie in proportion to the underlying assets, if the redemptions of a unitholder are in excess of 1% of the net asset value of the Fund or \$1,000,000.

In accordance with the Fund's policy, the Investment Manager monitors the Fund's liquidity position on a daily basis with the Investment Policy Committee performing a quarterly review.

The table below analyses the Fund's financial liabilities into relevant maturity groupings based on the undiscounted cash flows for the remaining period at the reporting date to the contractual maturity date.

Total financial liabilities	<u>6,970,524</u>	<u>6,970,524</u>	<u>6,970,524</u>	-	-

d. Market price risk

Market price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instruments or issuer, or factors affecting all similar financial instruments traded in the market. The Fund is not exposed to equity securities price risk.

The Investment Manager moderates this risk through a careful selection of securities and other financial instruments within specified limits. The Fund's overall market positions are reviewed on a quarterly basis by the Investment Policy Committee and the Board of Directors.

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

12. Financial Risk Management (continued)

e. Interest rate risk

Cash flow interest rate risk is the risk that future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates.

The Fund takes on exposure to the effects of fluctuations in prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The Investment Policy sets limits on the level of mismatch of interest rate repricing that may be undertaken, which is monitored on a quarterly basis by the Investment Policy Committee and the Board of Directors.

The table below summarises the Fund's exposure to interest rate risks. It includes the Fund's financial instruments at carrying amounts, categorised by the earlier of contractual repricing or maturity dates.

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

12. Financial Risk Management (continued)

f. Currency risk

Currency risk is the risk that the value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Fund holds assets denominated in currencies other than the TT\$, the functional currency. The Fund is therefore exposed to currency risk as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund's policy is not to enter into any currency hedging transactions but to manage the risk by monitoring the level of non-TT\$ investments. The table below summarises the Fund's exposure to currency risks. The USD denominated balances are unquoted in TT dollars for both the current and comparative years.

Sensitivity of possible movement in select currencies

Stress testing is used as a market risk measurement technique which provides an indication of the potential size of losses that could arise in extreme conditions. The stress test conducted by the Fund includes risk factor testing, where stress movements are applied to each foreign currency. The US dollar was the major foreign currency to which the Fund had significant exposure. An analysis was conducted to demonstrate the sensitivity to reasonable possible movements of the US dollar against the TT dollar.

As at June 30, 2021, had the exchange rate between the TT dollar and other currencies increased or decreased by 10% with all other variables held constant, the increase or decrease in net assets attributable to unitholders would amount to \$ 25,672,110 (2020 : \$20,651,623).

ROYTRIN MONEY MARKET FUND CLASS A – TT DOLLAR

Notes to the Financial Statements

June 30, 2021

(Expressed in Trinidad and Tobago dollars)

12. Financial Risk Management (continued)

g. Credit risk

The Fund takes on exposure to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due. Credit exposures arise principally in investment activities that bring debt securities and other bills into the Fund's asset portfolio.

Credit risk is mitigated to some extent by not limiting the Fund's total exposure to a single credit. The Fund also reduces this risk by prudent credit analysis of issuers to restrict questionable credits in the Fund. The Fund also manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for industry concentrations, and by monitoring exposures in relation to such limits.

The Trustee has established a credit quality review process to provide early identification of possible changes in the creditworthiness of counterparties, including regular collateral revisions. Counterparty limits are established by the use of a credit risk classification system, which assigns each counterparty a risk rating and are validated, where appropriate, by comparisons with externally available data. The rating scale, which is shown below, reflects the range of default probabilities defined for each rating class. Risk ratings are subject to regular revision. The credit quality review process allows the Trustee to assess the potential loss as a result of the risks to which it is exposed and take corrective action.

(i) Internal ratings scale and mapping of external ratings

Internal Rating	Description of Grade	External rating Standard & Poor's Equivalent
1	Excellent	AAA, AA, A
2	Very good	BBB
3	Good	BB
4	Special mention	B, CCC
5	Unacceptable	CC, C

The rating of the major rating agency shown in the table above are mapped to the internal rating classes based on the long-term average default rates of each external grade. The Fund uses the external ratings where available to benchmark the internal credit risk assessment. Observed defaults per rating category vary year on year, especially over an economic cycle. Where a credit is not assigned a risk rating under the internal risk rating system and cannot be benchmarked against an international rating, these have been classified as unrated.

13. Operational Risk Management

Operational risk is inherent within all business activities. It is the risk of direct or indirect loss arising from lapses in the Trustee's processes, internal controls, personnel, technology and other external factors.

Examples include natural disasters, errors and omissions by personnel, and intentional behaviours such as fraud.

The Trustee's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to its reputation with overall cost effectiveness and innovation. Operational risk is managed by developing standards and guidelines in the following areas:-

- Appropriate segregation of duties and access
- Reconciling and monitoring of transactions
- Documentation of controls and procedures
- Training and development of staff
- Reporting of operational losses and proposed remedial actions
- Development of contingency plans
- Assessments of the processes
- Business continuity planning

The operational risk framework is supported by a programme of periodic review undertaken by Internal Audit. The results of Internal Audit reviews are discussed with management and summaries are submitted to the Audit Committee.

(Expressed in Trinidad and Tobago dollars)

14. Fair Value of Financial Instruments

a. Valuation framework

The Fund has an established control framework with respect to the measurement of fair values. This framework includes oversight by the Investment Management Committee. The main valuation methodology used is the Discounted Cash Flow (DCF) method. The DCF method requires the determination of the following three parameters:

1. projection period;
2. cash flows over the projection period plus terminal value;
3. the discount rate(s).

b. Valuation models

The Fund's financial assets are measured at fair value at the end of each reporting period. The Fund measures fair value using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from quoted prices).
- Level 3 fair value measurements are those from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

14. Fair Value of Financial Instruments (continued)

c. Fair value of financial assets and liabilities that are not measured at fair value

Management considers that the carrying amounts of the following financial assets and financial liabilities recognised in these financial statements approximate to their fair values due to short maturities on these instruments. All items below are classified as Level 2 in the fair value hierarchy.

	2021		*Restated 2020	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	\$	\$	\$	\$
Financial assets				
Interest income receivable	19,616,945	19,616,945	15,028,441	15,028,441
Other receivables	1,774,452	1,774,452	7,794,898	7,794,898
Cash and cash equivalents	<u>688,820,811</u>	<u>688,820,811</u>	<u>399,442,370</u>	<u>399,442,370</u>
	<u>710,212,208</u>	<u>710,212,208</u>	<u>422,265,709</u>	<u>422,265,709</u>
Financial liabilities				
Management fees payable	378,970	378,970	330,888	330,888
Other payables	<u>2,612,942</u>	<u>2,612,942</u>	<u>6,639,636</u>	<u>6,639,636</u>
	<u>2,991,912</u>	<u>2,991,912</u>	<u>6,970,524</u>	<u>6,970,524</u>

14. Fair Value of Financial Instruments (continued)

c. Fair value of financial assets and liabilities that are not measured at fair value (continued)

The financial instruments not measured at fair value include cash and cash equivalents, interest income receivable, management fees payable and other receivables/payables. These are short-term financial assets and financial liabilities whose carrying amounts approximate fair value because of their short-term nature and the high credit quality of counterparties.

d. Fair value of financial assets that are measured at fair value on a recurring basis

The following table gives information about how the fair values of these financial assets are determined (in particular, the valuation technique(s) and inputs used).

Financial Assets	Fair Value as at		Fair Value Hierarchy	Valuation Technique (S) And Key Inputs (S)
	2021	2020		
	\$	\$		
Government debt securities and corporate investments	2,977,787,154	3,010,519,850	Level 2	These are valued using generated discounted cash flow model. The model considers key inputs from observable yield curves at the end of the reporting period.

15. Impact of COVID-19

On March 11, 2020 the World Health Organisation declared the outbreak of Corona Virus (COVID-19) a pandemic due to it rapidly spreading across the Globe. The situation has adversely impacted global commercial activities and asset prices and has led to economic uncertainties. The rapid development and fluidity of this situation precludes any prediction as its ultimate impact, which may have a continued adverse impact on economic and market conditions and trigger a period of global economic slowdown. Up to the date of approval of the financial statements, the Trustee do not believe there is any significant financial impact on these financial statements as a result of this continuing event.
