	3-year	5-year	10-year		
1.53%	1.67%	1.39%	NA	1.27%	

Historical performance:

Market Update:

The local yield curve remained largely unchanged over the quarter, although the CBTT chose to raise the repo rate to 5% in their June 29th Monetary Policy Announcement, citing rising U.S. interest rates and an increasingly negative TT-US interest rate differential. In the CBTT's May 2018 Monetary Policy report, they indicated that data for the first quarter of 2018 suggest continued growth in energy sector output as the increase in production of natural gas continues to have positive knock-on effects on the mid-stream energy industries and petrochemicals sub-sectors. Preliminary data for the non-energy sector indicate that there was less subdued activity in the first quarter of 2018 in distribution while construction activity remained sluggish. With liquidity trending lower, we continue to anticipate that local interest rates will rise.
