SWIFT messaging solutions that fit your business

RBC's reliable and secure suite of SWIFT services has been designed to satisfy virtually any size and type of business.

At RBC[®] we understand the benefits of leveraging SWIFT messaging capability to help our customers run their businesses more efficiently. We also understand that sometimes it can be difficult to know which SWIFT service makes the most sense for your particular business. That's why RBC developed a comprehensive range of user-friendly SWIFT products that are simple to operate, easy to understand, and that can have a cost-effective impact on your bottom line.

RBC can work with you to match your business need to the most appropriate SWIFT service, starting from an entrylevel, Internet-based application that can be used to send an MT103 message or report details of an MT910 or MT950, to a software-installed application used to send and receive large volumes of any or every SWIFT message.

How can SWIFT have an impact on your business?

The Society for Worldwide Interbank Financial Telecommunication (SWIFT) is a member-owned global cooperative created to exchange standardized financial messages and information. SWIFT has more than 8,300 direct members, including banking organizations, securities institutions and corporate customers, in more than 200 countries that exchange messages for themselves and on behalf of underlying ordering clients. RBC can help your business leverage SWIFT and enable you to use a platform for automation and standardize financial transactions, which can result in reduced costs and reduced operational risk and inefficiencies. By using SWIFT, you can also create new business opportunities and revenue streams, including:

- Supported centralization of operations to improve efficiency and automation
- Increased information flow and data quality by maximizing straightthrough processing
- Reduced operational risk through secure transactions
- Reduced infrastructure costs associated with SWIFT access
- Increased global visibility of cash positions

RBC Royal Bank

Let RBC help you determine the right SWIFT messaging solutions for your business

SWIFT-related RBC applications

RBC Application	SWIFT-Related Services
