**RBC Royal Bank (Cayman) Limited**  
**Basel II Pillar 3 (Semi-Annual) Disclosures**  
**October 31, 2023**

**CAP – DETAILS ON THE BANK’S CAPITAL, INCLUDING SPECIFIC CAPITAL INSTRUMENTS**

**Scope**

RBC Royal Bank (Cayman) Limited is ultimately owned by Royal Bank of Canada (RBC), a publicly traded chartered bank. In June 2008, RBC acquired RBTT Financial Group (RBTT) creating RBC Financial (Caribbean) Limited (RBCFCL) with headquarters in Port of Spain, Trinidad. The Bank was incorporated locally on September 21, 2011, to become RBC Royal Bank (Cayman) Limited, a subsidiary of RBCFCL. The Bank has no subsidiaries and therefore, consolidation differences for accounting and regulatory purposes does not apply.

**Capital Structure**

The Bank’s accounting capital is comprised mainly of issued ordinary shares at par \$1.00 and retained earnings less any dividends paid. As recorded in the company’s financial statements as of October 31, 2023 the Bank’s total equity is \$212 million (audited financial statements as of October 31, 2022 was \$169 million).

The following table shows the Bank’s total eligible capital in respective Tiers as outlined in the guidelines on minimum capital requirements:

**October 31, 2023**

**CAP – DETAILS ON THE BANK’S CAPITAL, INCLUDING SPECIFIC CAPITAL INSTRUMENTS (Continued)**

**Capital Adequacy**

RBCFCL has in place a comprehensive Capital Management Framework (CMF) that provides a high-level overview of how RBCFCL and its subsidiaries, manage its capital in a coordinated and consistent manner across its organizational structure in order to ensure capital adequacy and ongoing compliance with all regulatory requirements and self-imposed internal targets. This framework is reinforced by key supporting policies and processes, which provide further detail surrounding the Annual Capital Plan process, the management of capital adequacy, subsidiary capital management and all capital-related transactions.

RBC Cayman adheres to an annual stress testing program to evaluate the subsidiary’s capital position under severe but plausible scenarios, to assist with capital adequacy and contingency planning. RBC Cayman is considered adequately capitalized as at October 2023 and is expected to remain so over the next 3 years (i.e. up to October 2026).

Corporate Treasury - Caribbean in conjunction with Finance prepares the Annual Capital Plan for its regulated subsidiaries such as RBC Cayman; incorporating financial goals, including the capital ratio targets within which the Group’s capital management is conducted. This is done in alignment with the Group Operating / Business Plan.

Internal Capital Adequacy Assessment Plan (ICAAP) is a regulatory prescribed process and forms one of its tools of ‘Supervisory Review’ as required by Pillar II of the Basel II framework. Through development of the ICAAP, Banks are required to demonstrate to Boards of Directors and to regulators that they have a thorough process for assessing adequacy of Capital relative to their risks, and also have sufficient capital resources to cover all material risks beyond the core minimum requirements, i.e. they maintain a safety cushion to accommodate a range of unexpected but plausible contingencies.

Core risks include credit, market and operational risks as defined and measured in accordance with prescribed regulatory guidance. Also considered within the scope of adequacy assessments are a broader range of risks. The ICAAP evaluates the Bank’s capital position in relation to its risk appetite, risk profile, business strategies, operating environment and sensitivity to a number of contingencies defined in stress tests.

Risk appetite and business strategy decisions determine the types and magnitude of risks faced by the institution. This in turn dictates the potential for unexpected losses and the institution’s overall requirements for capital. For RBC Cayman, the Capital Adequacy assessment is a function of capital required versus available, as measured by regulatory and internal requirements. Regulatory capital requirements of the entity are subject to Basel II Pillar 1 stipulations as required by CIMA.

The following table shows the risk weighted assets for credit, market and operational risk along with the minimum capital requirement for each. Also shown is the Total and Tier 1 capital adequacy ratio.

A loan is considered impaired and in default when the borrower is 90 days or more past due on any material obligation to the Bank and/or the Bank considers the borrower unlikely to make their payments in full without recourse action. For certain credit card balances, default occurs when payments are 180 days past due. For these balances, the use of a period in excess of 90 days past due is reasonable and supported by the performance experienced on historical credit card portfolios. The definition of default used is applied consistently from period to period and to all financial instruments unless it can be demonstrated that circumstances have changed such that another definition of default is more appropriate.

**RBC Royal Bank (Cayman) Limited**  
**Basel II Pillar 3 (Semi-Annual) Disclosures**  
**October 31, 2023**

**CCR1 – ANALYSIS OF COUNTERPARTY CREDIT RISK EXPOSURE BY APPROACH**

Counterparty credit risk is the risk that a party with whom the bank has entered into a financial or non-financial contract will fail to fulfill its contractual agreement and default on its obligation. It incorporates not only the contract's current value, but also considers how that value can move as market conditions change. Counterparty credit risk usually arises from trading-related derivative and repo-style transactions.

The Bank does not engage in these types of trading activities at this time.

**RBC Royal Bank (Cayman) Limited**  
**Basel II Pillar 3 (Semi-Annual) Disclosures**  
**October 31, 2023**

**CCR3 – STANDARDISED APPROACH OF CCR EXPOSURES BY REGULATORY  
PORTFOLIO AND RISK WEIGHTS**

Refer to Table CCR1. The Bank does not currently engage in trading related activities that give rise to significant counterparty credit risk.

**RBC Royal Bank (Cayman) Limited**  
**Basel II Pillar 3 (Semi-Annual) Disclosures**  
**October 31, 2023**

**CCR5 – COMPOSITION OF COLLATERAL FOR CCR EXPOSURE**

Refer to Table CCR1. The Bank does not currently engage in trading related activities that give rise to significant counterparty credit risk.

**RBC Royal Bank (Cayman) Limited**  
**Basel II Pillar 3 (Semi-Annual) Disclosures**  
**October 31, 2023**

**CCR6 – CREDIT DERIVATIVE EXPOSURES**

Refer to Table CCR1. The Bank does not currently engage in trading related activities that give rise to significant counterparty credit risk.

**RBC Royal Bank (Cayman) Limited**  
**Basel II Pillar 3 (Semi-Annual) Disclosures**  
**October 31, 2023**

**LIQ2 – NET STABLE FUNDING RATIO (NSFR)**

The available stable funding of the entity is driven primarily from capital (100% stable) and operational deposits from personal, non-personal and sovereigns. The majority of the assets requiring stable funding (50%) are primarily <1year loans to personal, non-personal and sovereigns. The entity has more operational deposits than less-than-1year loans compared to the required funding resulting in an elevated NSFR result.

In \$'000s		October 31, 2023				Weighted Value
		No Maturity	< 6 Months	6 Months to 1 Year	> 1 Year	
<b>Available stable funding (ASF) item</b>

**October 31, 2023**

**MR1 – MARKET RISK UNDER STANDARDISED APPROACH**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility or market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices.

The bank does not hold financial assets and liabilities sensitive to changes in market variables aside from foreign exchange and interest rates. As such, the Bank is not deemed to have significant other price risk exposures and the Bank does not engage in market trading activities.

The following table shows the component of RWA under the standardised approach allocable to market risk:

		October 31, 2023
	<b>Outright products</b>	
1	Interest rate risk (general and specific)	-
2	Equity risk (general and specific)	-
3	Foreign exchange risk	50,576
4	Commodity risk	-
