Market Update

Trinidad and Tobago's energy sector, the engine of our economy, began to sputter in late 2025. Between October and November, crude oil production managed a modest 3.1% increase year-on-year, but this couldn't offset natural gas output's steep 8.6% decline. Downstream industries fared even worse. While natural gas liquids production ticked up just 0.9%, ammonia and methanol output plummeted 3.4% and 9.5%, respectively, signaling real strain in our petrochemical sector. Beyond energy, the broader economy remained sluggish. Retail, construction, and manufacturing all showed weakness, though agriculture and utilities posted modest gains. The job market reflected the slowdown, with unemployment rising to 4.8% by Q3 2025. On a brighter note, inflation stayed remarkably low. Headline inflation cooled to 0.6% year-over-year in February 2026, down from 0.7% a year earlier, while food prices actually declined 0.1% thanks to cheaper vegetables. Core inflation edged up slightly to 0.8%, suggesting price pressures remain contained. The Central Bank responded by holding the repo rate steady at 3.5%, maintaining an accommodative stance to support the slowing economy.

Notwithstanding, interest rates in the broader financial system crept higher as the quarter progressed. The one-year Trinidad and Tobago treasury bill yield rose from 4.60% in late December to 4.64% by March, a subtle but telling shift that reflects markets pricing in future uncertainty and tighter system liquidity. This modest increase suggests investors are becoming cautious about the months ahead, seeking slightly higher returns to compensate for emerging risks. For savers and borrowers alike, it's a signal that the era of ultra-low rates may be ending, though the pace of change remains gradual. The combination of a weakening energy sector, subdued non-energy activity, and rising interest rates paints a picture of an economy navigating challenging terrain, even as inflation remains well-controlled.

Disclaimer

The calculation of the Net Asset Value (NAV) of the Fund is determined by the total assets attributable to the Fund minus the total liabilities attributable to the Fund. The NAV per unit for the Fund is determined by dividing the NAV for the Fund by the number of Units outstanding on the Valuation Day.

The composition of the investment portfolio may change due to ongoing portfolio transactions of the CIS and quarterly updates are made available on the website of RBC Royal Bank (Trinidad & Tobago) Ltd..

Commissions, trailing commissions, management fees and expenses all may be associated with collective investment scheme (CIS) investments. Please read the prospectus before investing. When making an investment decision, you should consult with a qualified financial advisor who can provide advice on the suitability of any investment for you based on your investment objectives, investment experience, financial situation and needs, or other relevant information.

Except as otherwise noted, the indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all income distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. The rates of return for periods of less than one year are simple rates of return. Past performance may not be repeated and there can be no assurance that the future performance will meet past performance levels.

CISs are not guaranteed or covered by the Deposit Insurance Corporation or by any other government deposit insurer. For funds other than money market funds, unit values change frequently. For money market funds, there can be no assurances that the fund will be able to maintain its net asset value per unit at a constant amount or that the full amount of your investment in the fund will be returned to you.

The quarterly portfolio report is provided for informational purposes only. The information contained within is not, and should not be construed as, investment or tax advice. You should not act or rely on the information contained in the quarterly portfolio summary without seeking the advice of an appropriate professional advisor.
