Market Update

Overall economic growth in the third quarter of 2024 was driven by increased production in the energy sector, marking the first year-on-year gain in nearly two years. This positive momentum was further supported by stronger output in the non-energy sector, and Central Bank of Trinidad and Tobago (CBTT) estimates suggest that this momentum continued into the fourth quarter of 2024. However, data from the Ministry of Energy and Energy Industries for the first quarter of 2025 was a mixed bag. Natural gas production declined 5.9% year-on-year for Q1 2025, in contrast to a 6.1% rise in crude oil production. In the petrochemical sector, output in ammonia and urea increased while methanol production dropped significantly. Notably, indicators monitored by CBTT suggest that overall activity in the non-energy sector remained positive at the start of 2025, albeit at a slower pace. Looking at other statistics, according to the Central Statistical Office, the unemployment rate stood at 4.9% at the end of Q1 2025, with a participation rate of 54.3%. Headline inflation, as measured by the Consumer Price Index, rose to 1.5% (year-on-year) in June 2025 driven by higher Food and Non-alcoholic beverage prices. Financially, private sector credit continued to expand through April 2025, while excess system liquidity slipped to \$4.8 billion in June, after peaking at \$7.35 billion a few months earlier. The CBTT still defines this level as ample. In support of the domestic economy, the Monetary Policy Committee maintained the repo rate of 3.5% in June 2025. During the second quarter, the 1-year TTD yield decreased, moving from 4.25% at the end of March 2025 to 4.14% at the end of June. An uptick in short-term yields over the past month has been observed, reflecting tighter system liquidity.

Disclaimer

The calculation of the Net Asset Value (NAV) of the Fund is determined by the total assets attributable to the Fund minus the total liabilities attributable to the Fund. The NAV per unit for the Fund is determined by dividing the NAV for the Fund by the number of Units outstanding on the Valuation Day.

The composition of the investment portfolio may change due to ongoing portfolio transactions of the CIS and quarterly updates are made available on the website of RBC Royal Bank (Trinidad & Tobago) Limited.

Commissions, trailing commissions, management fees and expenses all may be associated with collective investment scheme (CIS) investments. Please read the prospectus before investing. When making an investment decision, you should consult with a qualified financial advisor who can provide advice on the suitability of any investment for you based on your investment objectives, investment experience, financial situation and needs, or other relevant information.

Except as otherwise noted, the indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all income distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. The rates of return for periods of less than one year are simple rates of return. Past performance may not be repeated and there can be no assurance that the future performance will meet past performance levels.

CISs are not guaranteed or covered by the Deposit Insurance Corporation or by any other government deposit insurer. For funds other than money market funds, unit values change frequently. For money market funds, there can be no assurances that the fund will be able to maintain its net asset value per unit at a constant amount or that the full amount of your investment in the fund will be returned to you.
