Roytrin TTD Income Fund

Management Discussion and Analysis

Financial Position

The Fund's Total Assets decreased by 2.3% or \$55.7 million to \$2,412.8 million as at December 31, 2025 from \$2,468.4 million as at December 31, 2024, due primarily to a 3.3% or \$77.3 million decline in investment securities partly offset by a \$49.4 million increase in cash holdings. The reduced asset level was due to net redemptions of \$128.3 million during the year.

Statement of Profit or Loss

Total Income amounted to \$195.3 million in 2025, which represented a 151.6% or \$117.6 million increase in Income from \$77.6 million in 2024 due to unrealised fair value gains. Expenses declined during the year to \$73.6 million in 2025 from \$93.0 million in 2024. The Fund generated Net Profit After Taxes of \$121.5 million in 2025, which was a significant improvement from a loss of \$15.6 million in 2024.

International securities dominated the Fund's investment portfolio at 97%. U.S. bonds and money market instruments made up 92% and 5% of the portfolio respectively. Three interest rate cuts by the U.S. Federal Reserve during 2025 led to lower U.S. bond yields which increased bond prices and led to improved returns during 2025 in comparison to the previous year.

Returns

The Net Asset Value (NAV) per unit, as expressed in the audited financial statements, improved to \$24.031 as of December 31, 2025, compared to \$23.330 as of December 31, 2024. The appreciation in the NAV, combined with higher income distributions during the period, led to a total return of 5.17% for 2025, compared to a 0.51% return in 2024.

Related Party Transactions as of December 2025

A party is related to the Fund if:

- (a) The party is a subsidiary or an associate of the Fund;
- (b) The party is, directly or indirectly, either under common control or subject to significant influence with the Fund, or has significant influence over or joint control of the Fund.
- (c) The party is a close family member of a person who is part of key management personnel or who controls the Fund;
- (d) The party is controlled or significantly influenced by a member of key management personnel or by a person who controls the Fund;
- (e) The party is a joint venture in which the Fund is a venture partner;
- (f) The party is a member of the Fund's or its Trustee's key management personnel;
- (g) The party is a post-employment benefit plan for Fund's employees.
- (h) The party, or any member of a group of which it is a part, provides key management personnel services to the Fund.

The related party balances and transactions with the Investment Manager and other related parties are as follows:

Functions Outsourced to Third-Parties

The following functions were outsourced by RBC Trust (Trinidad & Tobago) Limited to RBC Investment Management (Caribbean) Limited under a Services Agreement with an effective date of April 14, 2025:

Financial Statements Services

- a) Account Preparation for CIS Clients (Quarterly)
- b) Account Preparation for CIS Clients (Monthly)
- c) Audited Accounts
- d) Prepare financials for publication (Interim)
- e) Prepare financials for publication (Audited Annual)
- f) Submission of audited financial statements to the Trinidad & Tobago Securities and Exchange Commission (TTSEC)

Roytrin TTD Income Fund

Annual Comparative Financial Statements as of December 2025

Statement of Trustee's Responsibilities

The Trustee is responsible for the following:

- Preparing and fairly presenting the accompanying financial statements of Roytrin TT Dollar Income Fund (the Fund), which comprise the statement of financial position as at December 31, 2025, the statements of profit or loss, changes in net assets attributable to unitholders and cash flows for the year then ended, and a summary of material accounting policies and other explanatory information;
- Ensuring that the Fund keeps proper accounting records;
- Selecting appropriate accounting policies and applying them in a consistent manner;
- Implementing, monitoring and evaluating the system of internal control that assures security of the Fund's assets, detection/prevention of fraud and the achievement of operational efficiencies;
- Ensuring that the system of internal control operated effectively during the reporting period;
- Producing reliable financial reporting that complies with laws and regulations, to which the Fund is subject, but not limited to the Fund's governing documentation; and
- Using reasonable and prudent judgement in the determination of estimates.

In preparing these financial statements, the Trustee utilised the IFRS Accounting Standards, as issued by the International Accounting Standards Board and adopted by the Institute of Chartered Accountants of Trinidad and Tobago. Where IFRS Accounting Standards presented alternative accounting treatments, the Trustee chose those considered most appropriate in the circumstances.

Nothing has come to the attention of the Trustee to indicate that the Fund will not remain a going concern for the next twelve months from the reporting date; or up to the date the accompanying financial statements have been authorised for issue, if later.

The Trustee affirms that it has carried out its responsibilities as outlined above.

Independent auditor's report

To the Unitholders of Roytrin TT Dollar Income Fund

Our opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Roytrin TT Dollar Income Fund (the Fund) as at 31 December 2025, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards.

What we have audited

The Fund's financial statements comprise:

- the statement of financial position as at 31 December 2025;
- the statement of profit or loss for the year then ended;
- the statement of changes in net assets attributable to unitholders for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, comprising material accounting policy information and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

PricewaterhouseCoopers, PO Box 550, 11-13 Victoria Avenue, Port of Spain, 100902, Trinidad and Tobago
T: +1 868 299 0700

www.pwc.com/tt

Independence

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code) as applicable to audits of financial statements of public interest entities. We have also fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Responsibilities of Trustee and those charged with governance for the financial statements

Trustee is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards, and for such internal control as Trustee determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Trustee is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Trustee either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

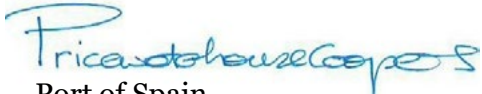

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those

risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Trustee.
- Conclude on the appropriateness of Trustee's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to the Financial Statements

31 December 2025

(Expressed in Trinidad and Tobago dollars)

1 Description of the Fund

The following brief description of the Roytrin TT Dollar Income Fund (the Fund) is provided for general information purposes only. Reference should be made to the Trust Deed and rules of the Fund for more complete information.

Administration

The Fund is administered in accordance with the rules referred to in the Trust Deed and the laws of the Republic of Trinidad and Tobago. The Trinidad and Tobago Security Exchange Commission is the regulator of the Fund.

General

The Fund is an open-ended fund registered in Trinidad and Tobago and was established by RBC Royal Bank (Trinidad and Tobago) Limited, under a Trust Deed dated February 6, 1996. The principal activity of the Fund is to provide investors with the opportunity to access professional investment management across regional and global markets with the objective of obtaining a high yield over the medium to long term. The Trustee of the Fund is RBC Trust (Trinidad and Tobago) Limited and the Investment Manager is RBC Investment Management (Caribbean) Limited.

Subscriptions

Subscriptions to the Fund are made by investors at a price per unit (subscription price) based on the net asset value per unit determined each business day. Units may be subscribed at a minimum value of \$500 and \$100 thereafter.

Distributions

The net income and net realised capital gains of the Fund are allocated and distributed to the investors monthly at the discretion of the Investment Manager. Investors have the option to either receive a cash distribution, or to reinvest income distributions into units at the prevailing subscription price as at the date of distribution. All distributions will, in the absence of instructions from the investor to the contrary, be reinvested in additional units of the Fund at the net asset value calculated on the date of distribution.

Redemptions

Units are redeemed without charge at a price per unit (bid price) based on the net asset value per unit at the date of receipt of the request for redemption. Units may be redeemed in cash up to a limit of \$500,000 or one percent of the net asset value of the Fund, whichever is lower, during any ninety-day period for any one investor. Should a redemption request exceed this limit, units in excess may at the discretion of the Trustee be redeemed in specie in proportion to the underlying assets.

Taxation

Distributions paid to resident unit holders are not subject to tax. For distributions paid to non-resident unit holders, tax on interest income is withheld at the rates applicable to the country in which the unit holders reside.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

2 Material accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

a. Basis of preparation

These financial statements have been prepared in accordance with IFRS Accounting Standards (IFRS). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of fair value through profit and loss (FVTPL) financial assets.

The preparation of the financial statements in conformity with IFRS requires management to exercise its judgment in the process of applying the Fund's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are included in Note 4.

b. Foreign currency transactions

(i) Functional and presentation currency

These financial statements are presented in Trinidad and Tobago dollars which is the Fund's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss. IFRS allows net foreign exchange gains/losses to be netted with realised gains/losses shown separately.

c. Investment securities

The Fund classifies its investment securities as fair value through profit or loss. Management determines the classification of its investment securities at initial recognition.

Fair value through profit or loss investment securities

Fair value through profit or loss investments are those investment securities intended to be traded on a periodic basis to maximize capital gains.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

2 Material accounting policies (continued)

c. Investment securities (continued)

(i) Recognition, initial and subsequent measurement

Fair value through profit or loss investment securities are initially recognised at cost and are subsequently remeasured at fair value based on quoted market prices where available or discounted cash flow models. Unrealised gains and losses arising from changes in the fair value of investment securities classified as fair value through profit or loss are recognised in profit or loss. Refer to Note 9.

(ii) Classification

On initial recognition, the Fund classifies financial assets at amortised cost or FVTPL:

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI).

All other financial assets of the Fund are measured at FVTPL.

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the Fund considers all of the relevant information about how the business is managed including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Fund's management;
- the risks that affect the performance of the business model (and the financial assets held within the business model) and how those risks are managed;
- how the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Fund's continuing recognition of the assets.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

2 Material accounting policies (continued)

c. Investment securities (continued)

(ii) Classification (continued)

The Fund has determined that it has two business models.

- Held-to-collect business model: this includes cash and cash equivalents, interest income receivable and other receivables. These financial assets are held to collect contractual cash flow.
- Other business model: this includes debt securities and equity investments. These financial assets are managed and their performance is evaluated on a fair value basis, with frequent sales taking place.

(iii) Fair value estimation

The fair values of quoted investments in active markets are based on current bid prices. For unlisted securities and those where the market is not active, the Fund establishes fair value by using valuation techniques.

These include the use of recent arm's length transactions, discounted cash flow analysis, pricing models and other valuation techniques commonly used by market participants.

All purchases and sales of investment securities are recognised on the trade date.

(iv) Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest in such transferred financial assets that is created or retained by the Fund is recognised as a separate asset or liability.

When the Fund enters into transactions whereby it transfers assets recognised on its statement of financial position but retains either all or substantially all of the risks and rewards, then the transferred assets are not derecognised. Transfers of assets with retention of all or substantially all of the risks and rewards include sale and repurchase transactions.

The Fund derecognises a financial liability when its contractual obligations are discharged or cancelled or expired.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

2 Material accounting policies (continued)

d. Impairment of financial assets

The Fund utilizes the expected credit loss (ECL) model to determine impairment of financial assets which are classified as financial instruments that are measured at amortised cost.

ECLs are probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flow that the Fund expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12-months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The Fund measures loss allowances at an amount equal to lifetime ECLs, except the following, which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Fund considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Fund's historical experience and informed credit assessment and including forward-looking information.

The Fund assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Fund considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Fund in full, without recourse by the Fund to actions such as realising security (if any held); or
- the financial asset is more than 90 days past due.

The Fund considers a financial asset to have low credit risk when the credit rating of the counterparty is equivalent to the globally understood definition of 'investment grade'.

ECL has been determined based on the following inputs, assumptions and techniques used for estimating impairment:

- Probability weightings applied:

The use of comparable instrument types, credit ratings, the probability of default was obtained from S&P, while the Loss Given Default was obtained from Moody.

- Drivers of forward-looking information:

This is a formulation of three scenarios consisting of a central scenario, most likely comparable (with one upside and one downside) and less likely.

- Drivers of forward-looking information: (continued)

The drivers for the forward-looking information are GDP annual growth rate, inflation rate and unemployment rate with weightings of 10%, 20% and 70%. External information considered includes economic data and forecasts published by Government, monetary and supranational organisations such as the International Monetary Fund.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

2 Material accounting policies (continued)

d. Impairment of financial assets (continued)

- Sensitivity of expected credit losses to future economic conditions:

The ECL is sensitive to judgements and assumptions made regarding formulation of forward-looking scenarios and how such scenarios are incorporated into the calculations and analysis of loss allowance.

Presentation of allowance for ECLs in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amounts of the assets.

e. Cash and cash equivalents

Cash and cash equivalents are measured at amortised cost and comprise cash in hand and deposits with banks and short-term investments with original maturities of less than three months at the time of acquisition.

f. Provisions

Provisions are recognised when the Fund has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

g. Net assets attributable to unitholders

The Fund classifies financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments.

The Fund has one class of redeemable units in issue and on liquidation of the Fund, they entitle the holders to the residual net assets, after repayment of all debts, liabilities, fees or commissions outstanding. All units rank *pari passu* in all respects and have identical terms and conditions. The redeemable units provide unitholders with the right to require redemption for cash at a value proportionate to the unitholder's share in the Fund's net assets at each redemption date, subject to certain restrictions as outlined in Note 1, and also in the event of the Fund's liquidation.

A puttable financial instrument that includes a contractual obligation for the Fund to repurchase or redeem these instruments for cash or another financial asset is classified as equity if it meets all of the following conditions:

- It entitles the holder to a pro rata share of the Fund's net assets in the event of the Fund's liquidation;
- It is in the class of instruments that is subordinate to all other classes of instruments;
- All financial instruments are in the class of instruments that is subordinate to all other classes of instruments have identical features;
- Apart from the contractual obligation for the Fund to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any other features that would require classification as a liability; and
- The total expected cash flows attributable to the instrument over its life are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the Fund over the life of the instrument.

The Fund's redeemable units meet these conditions and are classified as equity.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

2 Material accounting policies (continued)

h. Net income from financial instrument at FVTPL

Net income from financial instrument at FVTPL includes all realised and unrealised fair value changes, foreign exchange differences and interest and dividend income.

i. Expenses

Expenses are accounted for on the accrual basis.

j. Subscriptions and redemptions

Subscriptions and redemptions are recorded when the subscription and redemption is incurred.

k. Income tax

Under the current system of taxation in Trinidad and Tobago, the Fund is exempt from paying income taxes.

However, some dividend and interest income received by the Fund is subject to withholding tax imposed in certain countries of origin. Income that is subject to such tax is recognised gross of the taxes and the corresponding withholding tax is recognised as tax expense.

l. Comparative

When necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.

3 New and Revised IFRS Accounting Standards (IFRS)

a. New and amended standards and interpretations adopted by the Fund

The following standards and interpretations apply for the Fund's accounting period commencing on or after 1 January 2025:

- *Lack of Exchangeability – Amendments to IAS 21, 'The Effects of Changes in Foreign Exchange Rates'*

In August 2023, the IASB amended IAS 21 to add requirements to help entities to determine whether a currency is exchangeable into another currency, and the spot exchange rate to use where it is not. Prior to these amendments, IAS 21 set out the exchange rate to use when exchangeability is temporarily lacking, but not what to do when lack of exchangeability is not temporary. These new requirements apply for annual reporting periods beginning on or after 1 January 2025.

This amendment did not significantly impact the financial statements of the Fund.

b. Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Fund:

The following is a list of new IFRS reporting standards, interpretations and amendments issued that are not yet effective as at 31 December 2025 and have not been early adopted by the Fund. The Fund expects to implement these standards when they become effective.

Effective 1 January 2026:

- IFRS 9, 'Financial instruments', and IFRS 7, 'Financial instruments: Disclosures' - Amendments - Amendments to the classification and measurement of financial instruments.

Effective 1 January 2027:

- IFRS 18, 'Presentation and disclosure in financial statements'. This is a new IFRS standard replaces IAS 1, 'Presentation of financial statements'.

These amendments are not expected to significantly impact the financial statements of the Fund.

31 December 2025

(Expressed in Trinidad and Tobago dollars)

4 Critical accounting estimates and judgments in applying accounting principles

Expected credit losses

The measurement of expected credit loss allowance for financial assets measured at amortised cost requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances. The Fund's expected credit loss calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies as detailed in Note 2(d).

Determination of fair value of unquoted financial assets

The fair values of financial assets that are not quoted in active markets are determined by using valuation techniques. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. To the extent practical, models use only observable data, however areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. See Note 14.

5 Investment securities

	2025 \$	2024 \$
Government debt securities	438,415,482	473,900,717
Corporate debt securities	1,755,868,713	1,834,586,975

Quoted investment securities	2,019,773,285	2,047,156,768
Unquoted investment securities	235,448,476	285,374,347
	<u>2,255,221,761</u>	<u>2,332,531,115</u>

6 Number of participating units

Units outstanding at beginning of the year	105,750,946	114,082,029
Subscriptions	8,977,735	7,290,413
Redemptions	<u>(14,389,407)</u>	<u>(15,621,496)</u>
Units outstanding at the end of the year	<u>100,339,274</u>	<u>105,750,946</u>

7 Management fees

In accordance with the rules of the Trust Deed, management fees are paid to the Trustee at a rate of up to 2% of the average total assets of the Fund calculated on a daily basis.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

8 Total annual return

Total annual return represents capital appreciation during the period. Returns without the reinvestment option is calculated as the change in the net asset value during the period by adjusting the net asset value per unit if no reinvestments were made. Returns with the reinvestment option is calculated as the change in the net asset value during the period.

	2025 %	2024 %
Average rate of return without the reinvestment option (see Note 1 – distributions)	<u>5.11</u>	<u>0.51</u>
Average rate of return with the reinvestment option (see Note 1 – distributions)	<u>5.17</u>	<u>0.51</u>

9 Net income from Financial Instruments at FVTPL

	2025 \$	2024 \$
Interest income	111,671,025	121,212,476
Amortised premium	(10,466,211)	(10,734,044)
Realised gain on disposal	446,491	2,029,329
Unrealised gain/(loss) on revaluation	<u>93,608,043</u>	<u>(34,891,863)</u>
	<u>195,259,348</u>	<u>77,615,898</u>

The realised gain from financial instruments at FVTPL represents the difference between the carrying amount of a financial instrument at the beginning of the reporting period, or the transaction price if it was purchased in the current reporting period, and its settlement price.

The unrealised gain/(loss) represents the difference between the carrying amount of a financial instrument at the beginning of the period, or the transaction price if it was purchased in the current reporting period, and the carrying amount at the current reporting period.

10 Other payables

Included in other payables are accrued redemptions of \$330,200 (2024: \$162,201). These funds were requested on the last day of the year; however, payments were processed after the year ended.

11 Other administrative expenses

Other administrative expenses include audit fee amounting to \$230,047 (2024: \$202,145).

13 Related party transactions

A party is related to the Fund if:

- (a) The party is a subsidiary or an associate of the Fund;
- (b) The party is, directly or indirectly, either under common control or subject to significant influence with the Fund, or has significant influence over or joint control of the Fund.
- (c) The party is a close family member of a person who is part of key management personnel or who controls the Fund;
- (d) The party is controlled or significantly influenced by a member of key management personnel or by a person who controls the Fund;
- (e) The party is a joint venture in which the Fund is a venture partner;
- (f) The party is a member of the Fund's or its Trustee's key management personnel;
- (g) The party is a post-employment benefit plan for Fund's employees.
- (h) The party, or any member of a group of which it is a part, provides key management personnel services to the Fund.

Notes to the Financial Statements (continued)

Distributions to unitholders	112,137	92,138

14 Financial risk management

Financial Instruments

Financial assets include investment securities, interest income receivable, other receivables and cash and cash equivalents.

Financial liabilities include management fees payable, distributions payable and other payables.

a. Risk management

The Fund's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risk. Taking risk is core to the financial business and operational risks are an inevitable consequence of being in business. The Trustee's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects in the Fund's financial performance by focusing on the unpredictability of financial markets.

The Trustee's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls and to monitor the risks and adherence to limits by means of reliable and up to date information systems.

The most important types of risks to the Fund are liquidity risk, market risk, and credit risk. Market risks include currency risk, interest rate risk and other price risk.

While the Trustee is ultimately responsible for identifying and controlling risks, there are separate independent bodies responsible for managing and monitoring risks as follows:

Board of Directors of the Trustee

The Board of Directors of the Trustee has overall responsibility and oversight for corporate governance and specifically, approval of the investment policy and limits of authority. The Board of Directors has delegated authority to the Investment Committee and the Sub-Investment Committee as appropriate.

Investment Policy Committee

The Investment Policy Committee is the body responsible for approving all Statements of Investment Policy (SIP) and reviewing compliance with same. The Investment Policy Committee meets on a quarterly basis to review and ratify any changes to the SIP.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

14 Financial risk management (continued)

a. Risk management (continued)

Investment Strategy Committee

The Investment Strategy Committee is engaged in providing guidance to the Investment Manager relative to economic and capital markets. In this regard, input would include economic data, foreign currency perspectives, local, regional and international equity and fixed income information. From this body of information, the Committee shall distil its views with respect to an assessment of global fiscal and monetary conditions, projected economic growth, inflation, direction of interest rates, major currencies and stock prices.

Excessive Risk Concentration

In order to avoid an excessive concentration of risk, the Fund's investment policy and risk management procedures include specific guidelines to ensure the maintenance of a diversified portfolio.

The Investment Manager is mandated within prescribed limits to manage excessive concentration risk when it arises.

b. Classification of financial assets and financial liabilities

The table below sets out the classifications of the carrying amounts of the Fund's financial assets and financial liabilities into the categories of financial instruments.

	2025			
	Mandatorily at FVTPL	Financial Assets at amortised cost	Financial liabilities at amortised cost	Total

Total financial liabilities	<u>--</u>	<u>--</u>	<u>1,292,231</u>	<u>1,292,231</u>

c. Liquidity risk

The Fund is exposed to daily cash redemptions of units. At least 3% of the investment portfolio is usually held in short-term instruments that can be quickly converted to cash. The Fund also has the ability to borrow in the short term to ensure settlement, however no such borrowing occurred during the year. The Trust Deed also permits the Fund to settle in specie in proportion to the underlying assets, if the redemptions of a unit holder are in excess of 1% of the Fund.

In accordance with the Fund's policy, the Investment Manager monitors the Fund's liquidity position on a daily basis with the Investment Policy Committee performing a quarterly review.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

14 Financial risk management (continued)

c. Liquidity risk (continued)

The table below summarises the maturity profile of financial liabilities based on their undiscounted cash flows for the remaining period at the reporting date to the contractual maturity date.

	Carrying amount \$	Total \$	2025 Contractual cash flows		
			Up to 1 year \$	1 – 5 years \$	Over 5 years \$

Total financial liabilities	1,292,231	1,292,231	1,292,231	--	--

d. Market price risk

Market price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instruments or issuer, or factors affecting all similar financial instruments trade in the market. The Fund is not exposed to equity securities price risk.

The Investment Manager moderates this risk through a careful selection of securities and other financial instruments within specified limits. The Fund's overall market positions are reviewed on a quarterly basis by the Investment Policy Committee and Board of Directors.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

14 Financial risk management (continued)

e. Interest rate risk

Cash flow interest rate risk is the risk that future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Fund takes on exposure to the effects of fluctuations in prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The Investment Policy sets limits on the level of mismatch of interest rate repricing that may be undertaken, which is monitored on a quarterly basis by the Investment Policy Committee and Board of Directors.

The table below summarises the Fund's exposure to interest rate risks. It includes the Fund's financial instruments at carrying amounts, categorised by the earlier of contractual repricing or maturity dates.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

14 Financial risk management (continued)

e. Interest rate risk (continued)

Sensitivity of possible movements in interest rates

As at December 31, 2025, had interest rates increased or decreased by 100 basis points with all other variables held constant, the increase or decrease in net assets attributable to unitholders would amount to \$110,955,614 (2024: \$119,151,099), arising substantially from the increase/decrease in market values of debt securities.

f. Currency risk

Currency risk is the risk that the value or future cash flow of a financial instrument will fluctuate due to changes in foreign exchange rates. The Fund holds assets denominated in currencies other than the TT\$, the functional currency. The Fund is therefore exposed to currency risk as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund's policy is not to enter into any currency hedging transactions but to manage the risk by monitoring the level of non-TT\$ investments. The table below summarises the Fund's exposure to currency risks. The USD denominated balances are reported in TT dollars for both the current and comparative years.

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

14 Financial risk management (continued)

f. Currency risk

Sensitivity of possible movement in select currencies

Stress testing is used as a market risk measurement technique which provides an indication of the potential size of losses that could arise in extreme conditions. The stress test conducted by the Fund includes risk factors testing, where stress movements are applied to each foreign currency. The US dollar was the major foreign currency to which the Fund has significant exposure. A risk analysis was conducted to demonstrate the sensitivity to reasonable possible movements of the US dollar against the TT dollar.

As at December 31, 2025, had the exchange rate between the TT dollar and US dollar increased or decreased by 4 basis points (2024:11 bps) with all other variables held constant, the increase or decrease in net assets attributable to unitholders would amount to \$950,470 (2024: \$2,637,135).

g. Credit risk

The Fund takes on exposure to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due. Credit exposures arise principally in investment activities that bring debt securities and other bills into the Fund's asset portfolio.

Credit risk is mitigated to some extent by not limiting the Fund's total exposure to a single credit. The Fund also reduces this risk by prudent credit analysis of issuers to restrict questionable credits in the Fund. The Fund also manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties industry concentrations, and by monitoring exposures in relation to such limits.

The Trustee has established a credit quality review process to provide early identification of possible changes in the creditworthiness of counterparties, including regular collateral revisions. Counterparty limits are established by the use of a credit risk classification system, which assigns each counterparty a risk rating and are validated, where appropriate, by comparisons with externally available data. The rating scale, which is shown below, reflects the range of default probabilities defined for each rating class. Risk ratings are subject to regular revision. The credit quality review process allows the Trustee to assess the potential loss as a result of the risks to which it is exposed and take corrective action.

(i) Internal ratings scale and mapping of external ratings

Internal Rating	Description of Grade	External rating Standard & Poor's Equivalent
1	Excellent	AAA, AA, A
2	Very good	BBB
3	Good	BB
4	Special mention	B, CCC
5	Unacceptable	CC, C

The rating of the major rating agency shown in the table above are mapped to the internal rating classes based on the long-term average default rates of each external grade. The Fund uses the external ratings where available to benchmark the internal credit risk assessment. Observed defaults per rating category vary year on year, especially over an economic cycle. Where a credit is not assigned a risk rating under the internal risk rating system and cannot be benchmarked against an international rating, these have been classified as unrated.

15 Operational risk management

Operational risk is inherent within all business activities. It is the risk of direct or indirect loss arising from lapses in the Trustee's processes, internal controls, personnel, technology and other external factors. Examples include natural disasters, errors and omissions by personnel, and intentional behaviours such as fraud. The Trustee's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to its reputation with overall cost effectiveness and innovation. Operational risk is managed by developing standards and guidelines in the following areas:-

- Appropriate segregation of duties and access
- Reconciling and monitoring of transactions
- Documentation of controls and procedures
- Training and development of staff
- Reporting of operational losses and proposed remedial actions
- Development of contingency plans
- Assessments of the processes
- Business continuity planning

The operational risk framework is supported by a programme of periodic review undertaken by Internal Audit. The results of Internal Audit reviews are discussed with management and summaries are submitted to the Audit Committee.

16 Fair value of financial instruments

(a) Valuation framework

The Fund has an established control framework with respect to the measurement of fair values. This framework includes oversight by the Investment Management Committee. The main valuation methodology used is the DCF method. The DCF method requires the determination of the following three parameters:

1. projection period;
2. cash flows over the projection period plus terminal value.
3. the discount rate(s).

(b) Valuation models

The Fund's financial assets are measured at fair value at the end of each reporting period. The Fund measures fair value using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from quoted prices).
- Level 3 fair value measurements are those from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

(c) Fair value of financial assets and liabilities that are not measured at fair value

Management considers that the carrying amounts of the following financial assets and financial liabilities recognised in these financial statements approximate to their fair values due to short maturities on these instruments.

	2025		2024	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	\$	\$	\$	\$
Financial assets				
Interest income receivable	29,177,919	29,177,919	30,619,419	30,619,419
Other receivables	159,024	159,024	26,413,350	26,413,350
Cash and cash equivalents	128,233,717	128,233,717	78,873,457	78,873,457
	<u>157,570,660</u>	<u>157,570,660</u>	<u>135,906,226</u>	<u>135,906,226</u>
Financial liabilities				
Distributions payable	159,019	159,019	150,614	150,614
Management fees payable	668,554	668,554	679,391	679,391
Other payables	663,960	663,960	462,226	462,226
	<u>1,491,533</u>	<u>1,491,533</u>	<u>1,292,231</u>	<u>1,292,231</u>

Notes to the Financial Statements (continued)

31 December 2025

(Expressed in Trinidad and Tobago dollars)

16 Fair value of financial instruments (continued)

(c) *Fair value of financial assets and liabilities that are not measured at fair value (continued)*

The financial instruments not measured at FVTPL include:

Cash and cash equivalents, interest income receivable, and other receivables distributions payable, management fees payable and other payables. These are short-term financial assets and financial liabilities whose carrying amounts approximate fair value, because of their short-term nature and the high credit quality of counterparties and are determined to be level 2 in the fair value hierarchy.

(d) *Fair value of financial assets that are measured at fair value on a recurring basis*

The following table gives information about how the fair values of these financial assets are determined (in particular, the valuation technique(s) and inputs used).

	Fair value hierarchy	Fair Value as at		Valuation Technique (S) and key inputs (S)
		2025	2024	
		\$	\$	
Investment securities	Level 1	2,019,773,285	2,047,156,768	Quoted market prices.
Investment securities	Level 2	235,448,476	285,374,347	These are valued using an internally generated discounted cash flow model. The model considers key inputs from observable yield curves at the end of the reporting period.

Market Update

Trinidad and Tobago's economy demonstrated a solid 2.6% expansion in the second quarter of 2025 fueled by the robust performance of the Manufacturing (+9.5%) and Mining and Quarrying Sectors (+8.3%). Within Manufacturing, the Petroleum and Chemical Products segment led the charge with an 11.7% increase followed by a 9.2% jump in Food, Beverages and Tobacco Products and an 8.3% jump in Transport and Storage. These gains offset a 3.6% contraction in the Agriculture, Forestry and Fishing Industries. According to the IMF, Trinidad and Tobago's economy is projected to grow by 2.4% for the full year, largely attributed to a recovery in LNG and natural gas production. However, the labour market has shown some signs of cooling with the unemployment rate climbing to 4.8% by the end of Q3 2025, up from 3.8% in the prior quarter. Inflation remains notably subdued, ending November 2025 at 0.5%, up slightly from 0.4% in the prior month. The marginal increase was driven by a 22.2% spike in the Alcoholic Beverages and Tobacco segment, with the remaining categories experiencing relatively flat changes.

In the United States, significant downward revisions to job growth, coupled with sluggish hiring and moderating wage increases have cast a shadow over the health of the labour market. The economy added 181,000 jobs throughout 2025 marking the weakest annual gain since the pandemic. This reflects the cooling effects of heightened tariffs and a tightening immigration landscape. Despite these headwinds, the labour market has shown pockets of resiliency with specific industries maintaining robust hiring. Although GDP is decelerating, it remains fundamentally firm and the unemployment rate is expected to remain low by historical standards.

Bond markets have been relatively stable as investors weigh mixed signals: persistent inflationary pressures that continue to squeeze consumer purchasing power against a softening jobs report. This balancing act is further complicated by shifting dynamics with falling short-term rates and rising government deficits. The Federal Reserve (Fed) is therefore caught in a dilemma as cutting rates to support the softening labour market risks reigniting inflation while holding rates too high for too long could turn the hiring slowdown into a broader recession. At its January meeting, the Fed chose to hold rates steady at 3.50% - 3.75% and noted that while the labour market is rebalancing, inflation remains sticky and above its 2% target. Bonds remain attractive historically and are well positioned to generate solid returns over the long term.

Disclaimer

The calculation of the Net Asset Value (NAV) of the Fund is determined by the total assets attributable to the Fund minus the total liabilities attributable to the Fund. The NAV per unit for the Fund is determined by dividing the NAV for the Fund by the number of Units outstanding on the Valuation Day.

The composition of the investment portfolio may change due to ongoing portfolio transactions of the CIS and quarterly updates are made available on the website of RBC Royal Bank (Trinidad & Tobago) Limited.

Commissions, trailing commissions, management fees and expenses all may be associated with collective investment scheme (CIS) investments. Please read the prospectus before investing. When making an investment decision, you should consult with a qualified financial advisor who can provide advice on the suitability of any investment for you based on your investment objectives, investment experience, financial situation and needs, or other relevant information.

Except as otherwise noted, the indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all income distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. The rates of return for periods of less than one year are simple rates of return. Past performance may not be repeated and there can be no assurance that the future performance will meet past performance levels.

CISs are not guaranteed or covered by the Deposit Insurance Corporation or by any other government deposit insurer. For funds other than money market funds, unit values change frequently. For money market funds, there can be no assurances that the fund will be able to maintain its net asset value per unit at a constant amount or that the full amount of your investment in the fund will be returned to you.

The quarterly portfolio report is provided for informational purposes only. The information contained within is not, and should not be construed as, investment or tax advice. You should not act or rely on the information contained in the quarterly portfolio summary without seeking the advice of an appropriate professional advisor.

Roytrin TTD Income Fund

Key Facts Statement

Filed with the Trinidad and Tobago
Securities & Exchange Commission in **April 2026**

Quick Facts

Manager	RBC Investment Management (Caribbean) Limited
Classification	Income fund
Base Currency	Trinidad & Tobago Dollars (TTD)
Inception Date of Fund	February 7, 1996
Total Value	TT\$2,439.12 million (as of December 31, 2025)
Management Expense Ratio	2.04% (as per the annual audited financial statements on December 31, 2025)
Distribution Periods	Monthly on the first working day of each month
Minimum Initial Investment	TT\$500.00
Minimum Subsequent Investment	TT\$100.00

Investment Assets

Allowable Investments

The Fund's assets shall be spread between domestic and/or foreign investments of the following description:

- Corporate bonds and debentures
- Government bonds and other government debt obligations
- Money market instruments and deposits with financial institutions
- Mutual funds listed on any recognised stock exchange or traded on over-the-counter markets
- Securitised mortgages and debt obligations
- Other securitised investments
- Other short-term debt instruments

Investment Assets (continued)

Investment Restrictions

The Investment Manager shall apply the following investment restrictions to investments attributable to the Fund:

- Up to 95% in long-term securities.
- Up to 100% in short-term securities.
- At no time shall the Fund's holdings of any class of securities issued by a single company exceed 10% of that class of securities. In addition, at no time shall more than 10% of the monies of the Fund's total net asset value be invested in the securities of any single company.
- The monies of the Fund may not purchase an investment for the purpose of exercising control or discretion over the management of the company or be invested in more than 10% of the outstanding voting securities or outstanding equity securities issued by any one company.
- At no time shall the total borrowings of the Fund exceed 5% of its total net asset value. Borrowing will only be for the temporary purposes of meeting redemption requests while the Fund effects an orderly liquidation of portfolio assets or permitting the Fund to settle portfolio transactions. All borrowings must be repaid within six months from the date of borrowing.
- The value of the Fund's holdings in any one issue of government and other public securities shall not exceed 30% of that issue.
- The Fund should not hold more than 10% of its net asset value in assets that are not listed, quoted, readily tradeable on a securities market or readily tradeable on an over-the-counter market. This does not apply to government and other public securities.
- The Fund may invest in any warrants, options, futures, commodities and other derivatives for hedging purposes only. The Fund is restricted from writing uncovered options but may make covered calls without restriction.
- The Fund may not invest in another Collective Investment Scheme so that the value of the Fund's holdings in units of the other Collective Investment Scheme ("the Target CIS") exceeds 20% of the total Net Asset Value of the Fund; so that the Fund's holdings in the Target CIS exceeds 25% of the units of the Target CIS or where the dates for calculating the Net Asset Value of the Target CIS are less frequent than those of the Fund.

Investor Profile, Risk Details, Guarantee & Tax Information

Investor Profile

Individuals over eighteen (18) years of age and qualifying legal entities may purchase units of the Fund. In addition, the Fund is an eligible investment for the statutory funds of insurance companies and pension plan portfolios.

The Fund provides investors with monthly income distributions and the potential for capital appreciation. The Fund may be suitable for investors with a medium-term investment horizon and those with a low-to-medium tolerance for volatility.

Risk Disclosure

Investment securities markets fluctuate constantly in reaction to interest rates, economic news, company specific news, geopolitical events and a wide range of other factors. The value of the investment securities in the mutual fund may change from day to day, reflecting changes in interest rates, economic conditions, as well as market and company news. As a result, the value of the units may go up and down, and the value of your units may be more or less when you redeem them than when you purchased them. Unlike bank accounts, Collective Investment Scheme (CIS) units are not covered by the Deposit Insurance Corporation.

Risk Rating

Due to the volatility inherent in investing in fixed income securities, the overall risk rating on this fund is low to medium.

Guarantee

The Fund provides no guarantee as to the price of units or the investment returns.

Tax Consequences

- **Citizens or Residents of Trinidad & Tobago:** There are no tax charges or tax benefits associated with investing in this mutual fund, receiving income distributions or selling units in this mutual fund.
- **Non-Residents of Trinidad & Tobago:** Income distributions will be subject to withholding tax (to be deducted prior to distribution) at the rate applicable to the country in which they reside. There are no other tax charges or tax benefits associated with this fund.

Fees & Charges

Payable by the Fund

- **Trustee, Investment Manager and Distributor Fee:** Up to 2.00% of Assets under Management
- **Administrative Expenses:** The Fund's Trustee shall pay out of the Fund all administrative expenses, including but not limited to legal, accounting, auditing and mailing fees, as well as expenses associated with the provision and publication of any reports or information necessary for complying with regulatory and statutory requirements.

Payable by the Unitholder

There are no subscription or redemption fees charged to the unitholder.

General Information

The Roytrin TTD Income Fund was constituted via Deed of Trust in Trinidad & Tobago on February 5, 1996.

The Net Asset Value per unit is calculated on every valuation day, which is any day from Monday to Friday on which banks in Trinidad & Tobago are open for business.

During any 90-day period, units may be redeemed up to a limit of TTD 1,000,000 or one percent, whichever is lower, of the net value of the fund for any one investor. Should a redemption request by an investor exceed this limit, units in excess of the limit may, at the discretion of the trustee, be redeemed in specie in proportion to the underlying assets. Where units are redeemed in specie, any costs incurred in transferring assets in specie will be for the investor's account.

The prospectus is a concise outline of relevant information about the Fund which an investor should know before making a decision to purchase the Units. It contains information about the Fund as well as the names of the persons responsible for its organisation and management. You are encouraged to read the prospectus in its entirety prior to making any investment decision. The prospectus is available at the website of www.rbc.com/caribbean.
