

RBC® U.S. MarketSmart GIC

Ensure that your investment is guaranteed to grow: get a guaranteed minimum return, plus the potential for a higher return based on the stock market's performance.

The **RBC U.S. MarketSmart GIC** in Canadian dollars delivers the best of both worlds — the security of a GIC with a guaranteed minimum return *and* the potential for a higher return tied to the performance of the S&P 500[†] equity index. This is ideal if you need the growth potential of equity but want to preserve your principal.

Is this GIC right for you?

This GIC may be an appropriate choice if you:

- ✓ Want a guaranteed minimum return with the potential for a higher rate of return
- ✓ Want peace of mind knowing you'll get 100% of your principal as well as at least the guaranteed minimum
- ✓ Want the simplicity of principal protection and growth in one solution
- ✓ Will not need regular income from this investment

How returns are calculated

Unlike traditional GICs that guarantee a specific rate of return, the RBC U.S. MarketSmart GIC's return is variable and depends on how much the S&P[†] 500 equity index increases over the 2-, 3- or 5-year term of the GIC. The index used to calculate returns for the RBC U.S. MarketSmart GIC is the S&P 500 Index.[†] Although the underlying index is a U.S. equity index, the RBC U.S. MarketSmart GIC is a Canadian dollar investment and all returns are calculated and payable in Canadian dollars.

You will always receive 100% of your principal as well as the guaranteed minimum return. However, the additional return is calculated on the day the GIC comes due and is based on three factors:

- **Minimum and Maximum Returns:** With the RBC U.S. MarketSmart GIC, you are always guaranteed to receive at least the minimum return. This means that even if the markets perform poorly, you still receive the guaranteed minimum

return. If the markets perform well and the underlying S&P 500 equity index increases, you will get a higher rate of return, up to the maximum rate set out at the time of purchase.

- **Index Settlement Level (ISL):** The closing level for the S&P 500 Index for the business day preceding the maturity date.
- **Index Base Level (IBL):** The closing index value on the first business day after the GIC issue date.

The formula used to calculate your variable return is the percentage change in the level of the S&P 500 Index.

Formula:

$$\text{Variable Return} = \frac{\text{ISL} - \text{IBL}}{\text{IBL}}$$

To calculate your variable return payment, multiply the principal by the variable return. If the variable return is below the minimum return, adjust it upwards to the minimum return set out at the time of purchase. If the variable return is above the maximum return, adjust it downwards to the maximum return set at the time of purchase.

Charting out return scenarios

To get a better idea of how it works, let's take a look at some return scenarios. For example, let's assume you purchase a 5-year RBC U.S. MarketSmart GIC and, at the time of purchase, the minimum return is set at 5% and the maximum return is set at 25%.

Depending on the growth of the underlying index over the 5-year term, there are three possible scenarios: the market is up, the market is down or the market is way up.

Before you invest ...

As with any investment choice, it's important that you make a fully informed decision. With the RBC U.S. MarketSmart GIC, you should be aware of the following:

- Past performance of the S&P 500 Index is not indicative of future returns.
- Investing in this type of GIC is not the same as investing directly in the stocks of the S&P 500 Index. For example, you won't have the right to

receive any dividends or distributions. The return on your GIC will not be identical to the return associated with the index.

- We determine the Variable Return and may exercise judgment and discretion in calculating it. Our calculations and determinations will be final. Potential conflicts between the interests of the depositors and the interests of RBC may arise.
- Any RBC U.S. MarketSmart GIC deposit made over the phone may be

cancelled by notifying us within two days of receipt of the Fact Sheet and confirmation.

- For each year you hold your RBC U.S. MarketSmart GIC, you will receive a T5 slip (Relevé 3 in Quebec) based on the minimum return at the time of purchase. In the final calendar year that includes the Maturity Date of your RBC U.S. MarketSmart GIC, you will receive a tax slip reflecting the return paid for the term, minus the interest income reported in previous years.

Highlights

Term	2-, 3- and 5-year terms (non-redeemable and non-transferable)
